DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Saini et al. (5,650,123).

In figure 1B, the Saini et al discloses:

An optical interconnection circuit, comprising:

- a substrate (12);
- a first element having a light emitting (14) function fixed on the substrate (12) by an adhesive;
- a second element having a light receiving (18) function fixed on the substrate by an adhesive; and
- an optical wave-guide (20) having an optical wave-guide member formed on the substrate to connect the first element and the second element through which a light emitted by the first element transmits to the second element, the optical wave-guide being formed on the substrate to cover a part of the first element and a part of the second element, and the optical wave-guide

having a function to transmit an optical signal emitted from the first element to the second element.

With regard to claim 1, the Saini et al reference discloses all the claimed invention.

Allowable Subject Matter

2. Claims 3-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 22-33 are allowed.
